Subject: Eye lift

To: fiorhina

Dear Fiorhina~

AMAZING !!!! That is how I feel after having my eyelid lift. I have NEVER really seen my eyelids. I have always had heavy upper lids that hung on my eyes. In looking at photos of myself as a child , you could not see my lids. As I got older of course it became much worse. I would stand in front of the mirror pulling up the top lids to see what I would look like with visable eyelids. I had toyed with the idea of having surgery to reveal what people have never seen but of course my children's needs came first and I was a little frightened.

I finally overcame my fear and was tired of looking older than I really am. I made the appointment and the rest is history. I totally LOVE my eyes. Instead of looking in the mirror and seeing a tired woman. I see a beautiful woman. This has done wonders for my self image. Friends look at me and know that something is different but just can't figure out what.

My experience with Dr. Prasad and his wonderful staff was fantastic. All are very professional and at the same time compassionate and warm. My recuperation was just as expected and I am ready with my "new eyes" for my son's wedding just 5 weeks later.

Thank You Dr. Prasad for making me feel and look like a new woman.

Sincerely,

Jeanne
